Considerations

- Involve members of your target population in every step of the process, if possible.
- Use the words people use to describe themselves.
- Be clear about (and communicate) the practical utility of the project

Demographic Data

What words do you use to describe your gender?

If you *had* to choose one of the following words to describe your gender, which would you choose?

Sexual Health/Behavior Data

What words are you using to describe body parts? sexual acts?

How can you make these more inclusive so that people remain engaged?

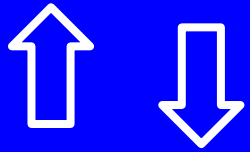

Analysis

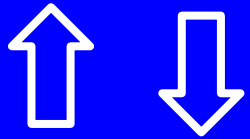

Considerations

- Involve members of your target population in every step of the process, if possible.
- Use the words people use to describe themselves.
- Contextualize the findings within the current (and historical) sociopolitical context
